Litho in USA

CAUTION
METRICS AT WORK

Detroit Diesel Engines contain parts dimensioned in the metric system as well as in the customary system. Many fasteners are metric and are very close in dimension to familiar customary fasteners in the inch system. It is important to note that, during any maintenance procedures, replacement fasteners must have the same measurements and strength as those removed, whether metric or customary. (Numbers on the heads of metric bolts and on surfaces of metric nuts indicate their strength. Customary bolts use radial lines for this purpose, while most customary nuts do not have strength markings.) Mismatched or incorrect fasteners can result in engine damage or malfunction, or possibly personal injury. Therefore, fasteners removed from the engine should be saved for re-use in the same locations whenever possible. Where the fasteners are not satisfactory for re-use, care should be taken to select a replacement that matches the original. For information and assistance, see your Detroit Diesel Allison Service Outlet.

NOTE: Metric Hardware is identified in the Parts Catalogs through its unique nomenclature. Conventional hardware can always be recognized by the inch marks (") common to diameter and length.

GENERAL INFORMATION

GENERAL INFORMATION

All engine components in this catalog are divided into twelve major groups of functionally related parts. A listing of the groups and their sub-groups appears under "Group Nomenclature" on page 4 of this section.

Within each sub-group different designs of similar equipment are shown, each being designated by a type number. The type number in one sub-group has no relationship to the same type number in another sub-group.

Each Engine Model is provided with a Model Index, showing Standard type numbers currently available on the model. Standard option types are indicated by a • symbol. Standard option and all optional type numbers are listed on the engine Option Plate, as shown in the illustration below.

The names and type numbers of optional equipment built into the unit at the factory are listed on this plate, along with the unit model, serial number and customer specification number (if any). Material not listed on the Option Plate is standard equipment and the type number is obtained from the model index. (Copies of the information, on the Option Plate Work Sheet, are furnished to distributors for their files.)

To locate a part, first, establish the group where the part is used (see the Alphabetical Index or Group Nomenclature page) then, determine the type number for the group from either the Option Plate or the Model Index. With this information, turn to the proper group and locate the type number at the top of the page. All parts applicable to the type are indicated by the quantity indicated in the column. An AR in this column indicates an "as required" quantity.

EXAMPLE

For purposes of illustration, a model 7063-7200 unit will be used. The following examples cover the steps to be followed:

1. To determine the part number of the crankshaft, refer to the Option Plate and note there is no reference to it, indicating it is standard equipment. Next turn to the Model Index and establish that the crankshaft is type 23 in group 1.3000. Turn to group 1.3000 and locate type 23 at the top of the page. All items with a quantity in this column apply to this unit. In sub-group 1.3001 crankshaft assy., the quantity in type 23 column shows the crankshaft to be part number 5146733.

2. To determine the proper crankshaft pulley for this unit again refer to the Option Plate and note that Crankshaft Pulley type number is 113, consult the group nomenclature page to establish that crankshaft pulley is group 1.3000C. Now turn to group 1.3000C and find type 113 at the top of the page. The quantity shown in type 113 at sub-group 1.3280 shows the crankshaft pulley to be part number 5122237.

ASSEMBLY BREAKDOWN

The Assembly Breakdown section is designed to eliminate repeating components of assemblies and sub-assemblies. When the Assembly Breakdown is used it is always found at the end of the group it pertains to. The pages are numbered with an alphabetical prefix. Assemblies which make use of the Assembly Breakdown will have a note to that effect under the sub-group heading. The note will refer to the page on which the assembly is shown. The part number will appear in the first group of the Assembly Breakdown showing the quantity used in one of the alphabetically designated columns. All other items appearing in that column are components of the assembly.

ALPHABETICAL INDEX

The Alphabetical Index on page 5 is particularly helpful when only a part name is known and the group can not readily be determined. Parts are listed alphabetically by noun name, followed by a description of the application of the part and the final group location. Component parts of assemblies are not listed since they will appear in the body of the book immediately following the assembly to which they belong.

PARTS RELEASE

A Parts Release on Microfiche, is issued periodically to keep this catalog up-to-date. It consists of revised Fiche for insertion in the set. All new Fiche carry a date of issue. These should be inserted into the deck immediately upon receipt. Old Fiche may then be destroyed.

A checklist is included with each Microfiche update. This checklist will indicate, by date, those Fiche revised and reissued.

MISCELLANEOUS

At the beginning of each of the sections of this catalog there are several pages of illustrations. In each section of the parts list figure numbers refer to illustrations within that section only unless otherwise *noted. In* the majority of cases illustrations are typical, that is, they may represent more than one part number. For example, in the case of the flywheel housing, figure 3B of section 1.0000, a single housing is shown to represent all housings. Key numbers on illustrations are final group numbers.

In many instances a part has more than one application. Wherever a part appears in its second or third application the basic group is shown in parenthesis following the description.

Unless otherwise specified, standard bolts in the parts list are hexagon head. Other standard parts are described in detail.

The information and illustrations in this publication are based on the inoformation in effect at the time of approval for printing. The right is reserved to make changes at any time without notice.

YOUR PARTS ORDER WILL BE HANDLED MORE EFFICIENTLY IF YOU—

1. Provide the following information for material ordered:
   - A. Group in parts book in which it is specified.
   - B. Quantity desired.
   - C. Part Number.
   - D. Complete Nomenclature.
   - E. The Type number for the model concerned.
   - F. Complete unit model identification and serial number.
   - G. "TYPE" rather than "WRITE" the above information.
2. Furnish complete shipping instruction. This is particularly important in case the order is not to be handled in the regular manner. Indicate whether shipment should be made via parcel post, express, air freight, etc.
3. Confirm all telegraph and telephone orders immediately, clearly marking any such orders "CONFIRMING" to avoid duplication of shipment of such orders.

GROUP NOMENCLATURE

1.0000 ENGINE (less major assemblies)
- 1.1000 Cylinder Block
- 1.1000A Air Box Drains
- 1.2000 Cylinder Head
- 1.2000A Engine Lifter Bracket
- 1.3000 Crankshaft, Oil Seals and Stabilizers
- 1.3000A Crankshaft Front Cover
- 1.3000B Vibration Damper
- 1.3000C Crankshaft Pulley
- 1.3000D Crankshaft Pulley Belt
- 1.4000A Flywheel
- 1.5000A Flywheel Housing
- 1.5000B Flywheel Housing Adaptor
- 1.6000 Connecting Rod and Piston
- 1.7000 Camshaft and Gear Train
- 1.7000A Balance Weight Cover
- 1.7000B Accessory Drive
- 1.8000 Valve Injector Operating Mechanism
- 1.8000A Rocker Cover

2.0000 FUEL SYSTEM
- 2.1000A Fuel Injector
- 2.1000B Electronic Injector Controls
- 2.2000 Fuel Pump
- 2.2000A Fuel Pump Drain
- 2.3000A Fuel Filter and Strainer
- 2.3000A Fuel Filter and Strainer (Twin and Quad)
- 2.4000 Fuel Manifold and/or Connections
- 2.4000A Dual Fuel System
- 2.5000A Fuel Lines and Fuel Cooler
- 2.5000A Fuel Lines and Fuel Cooler (Twin and Quad)
- 2.6000A Fuel Tank
- 2.6000B Electric Governor
- 2.7000A Mechanical Governor
- 2.8000A Hydraulic Governor
- 2.9000 Injector Controls
- 2.9000 Injector Controls (Twin and Quad)
- 2.9000A Throttle Controls
- 2.9000A Throttle Controls (Twin and Quad)

3.0000 AIR SYSTEM
- 3.1000A Air Cleaner and/or Adaptor
- 3.2000A Air Silencer
- 3.3000A Air Inlet Housing
- 3.3000C Air Intake Manifold
- 3.4000 Blower and Drive
- 3.4000A Blower Drive Shaft
- 3.4000B Blcer End Plate Cover
- 3.5000A Turbocharger, Intercooler, and Aftercooler

4.0000 LUBRICATING SYSTEM
- 4.1000A Oil Pump
- 4.1000B Oil Distribution System
- 4.1000C Oil Pressure Regulator
- 4.2000A Oil Filter
- 4.3000A Oil Filter Lines
- 4.4000A Oil Cooler and Marine Gear Lines
- 4.5000A Oil Filler
- 4.6000A Dipstick
- 4.7000A Oil Pan
- 4.8000A Ventilating System

5.0000 COOLING SYSTEM
- 5.1000 Fresh Water Pump
- 5.1000A Fresh Water Pump Cover
- 5.2000A Water Outlet Manifold and/or Elbow
- 5.2000B Thermostat
- 5.2000C Water Bypass Tube
- 5.3000A Radiator

5.0000 COOLING SYSTEM (CONT'D)
- 5.3000B Water Connections
- 5.4000A Fan
- 5.4000B Fan Shroud
- 5.5000A Heat Exchanger or Keel Cooling
- 5.6000A Raw Water Pump
- 5.7000A Water Filter

6.0000 EXHAUST SYSTEM
- 6.1000A Exhaust Manifold and/or Connections
- 6.2000A Exhaust Muffler and/or Connections

7.0000 ELECTRICAL INSTRUMENTS
- 7.1000A Battery Charging Generator
- 7.2000A Battery Cables
- 7.2000B Automatic Starting
- 7.2000B Automatic Starting (Twin and Quad)
- 7.3000A Starting Motor
- 7.4000A Instruments
- 7.4000A Instruments (Twin and Quad)
- 7.4000B Tachometer Drive
- 7.4000B Tachometer Drive (Twin and Quad)
- 7.4000C Shutoff, Alarm and O.S. Governor
- 7.4000C Shutoff, Alarm and O.S. Governor (Twin and Quad)
- 7.5000A Power Generator
- 7.6000A Control Cabinet
- 7.6000A Control Cabinet (Twin and Quad)
- 7.7000A Wiring Harness
- 7.8000A Air Heater
- 7.8000A Air Heater (Twin and Quad)
- 7.10000A Hydraulic Governor Solenoid

8.0000 POWER TAKE-OFF
- 8.1000A Power Take-off and/or Clutch
- 8.1000A Power Take-off and/or Clutch (Twin and Quad)
- 8.3000A Torque Converter
- 8.3000A Torque Converter (Twin and Quad)
- 8.3000B Transmission Lines

9.0000 TRANSMISSION AND PROPULSION
- 9.1000A Hydraulic Marine Gear
- 9.1000A Hydraulic Marine Gear (Twin and Quad)
- 9.2000A Reverse and Reduction Gear (mechanical)
- 9.3000A Power Transfer Gear
- 9.3000A Power Transfer Gear (Twin and Quad)
- 9.4000 Transmission—Highway
- 9.7000 Transmission—Off-highway
- 9.9000 Transmission—Rail Car

10.0000 SHEET METAL
- 10.1000A Engine Hood

11.0000 ENGINE MOUNTING
- 11.1000A Engine Mounting and Base
- 11.1000A Engine Mounting and Base (Twin and Quad)

12.0000 MISCELLANEOUS
- 12.2000A Bilge Pump
- 12.3000A Vacuum Pump
- 12.4000A Air Compressor
- 12.5000A Hydraulic Pump
- 12.6000A Gasoline Starter
- 12.6000B Air Starter
- 12.6000C Cold Weather Starting Aid
- 12.6000D Hydraulic Starter
- 12.6000E Hydraulic Starter Accessories
- 12.8000A Supplies
- 12.8000B Fabrication Material
- 12.8000C Miscellaneous Service Kits and Sets
- 12.8000D Miscellaneous Service Parts

APPLICATION DESIGNATIONS:

7082-7200	*MARINE*
7083-7200	INDUSTRIAL F-F
7084-7200	POWER-BASE
7065-7200	GENERATOR
7087-7000	VEHICLE F-F
7088-7000	VEHICLE F-F

BASIC ENGINE ARRANGEMENTS:

Rotation: L (left) and R (right) designates rotation viewed from the front of the engine.

Type: A-B-C-D designates location of starter and oil cooler as viewed from the rear (flywheel) end.

Cylinder Bank: Left and right cylinder banks are determined from rear of engine.

DESIGN VARIATIONS:

7082-7000	V-71 "N" ENGINE
7082-7100	2 VALVE HEAD ENGINE
7082-7200	4 VALVE HEAD ENGINE
7082-7300	TURBOCHARGED ENGINE
7082-7400	TURBO-AFTERCOOLED ENGINE
7082-7500	CUSTOMER SPEC. ENGINE
7087-7600	CONSTANT HORSEPOWER ECONOMY (TAE) (CALIFORNIA CERTIFIED)
7087-7700	CONSTANT HORSEPOWER (TT)
7087-7800	CONSTANT HORSEPOWER (TTA) (CALIFORNIA CERTIFIED)
7087-7900	CONSTANT HORSEPOWER ECONOMY (TTAE) (CALIFORNIA CERTIFIED)

DRIVE SHAFT ROTATIONS:

7242-0200	LEFT-HAND
7242-9200	RIGHT-HAND

Drive shaft rotation: shaft rotation on multiple units is determined from the rear of the unit.
